## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed December 30, 2004 have been fully considered but they are not persuasive.

In re page 11, applicant argues that in particular, language has been added to independent claims 1 and 8 such that the claims now fall within one of the safe harbors as discussed in the guidelines set forth in section 2106 of the MPEP.

In response, the examiner respectfully disagrees. The amended claims 1 and 8 do not appear to fall within any of the "Safe Harbors" because they consist solely of mathematic operations without some claimed practical application that are discussed accordance with the guidelines set forth in section 2106 of the MPEP.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-9 are rejected under 35 U.S.C. 101 because, as amended, the claimed invention is directed to non-statutory subject matter.

4. The instant written description describes a mathematical equation/"algorithm" which can be programmed into a computer and used to calculate an "objective sharpness quality score" given set of variables entered therein wherein, as described, said variables can be derived from the processing of "real-world" quantities/signals [SEE: paragraph 0032 of the instant description]. However the pending claims, as amended, appear to be directed to the mathematical algorithm itself and do not appear

Art Unit: 2614

to be recite steps for deriving the variables from the real-world quantities/signals; the claims do not recite:

a) Steps which real-world image signals are received and/or processed by the disclosed/recited algorithm;

b) Steps in which a physical transformation results outside of the "computer" which is performing the disclosed/recited algorithm;

c) etc, ...

That is the pending claims, as amended, do not appear to fall within any of the "Safe Harbors" because they consist solely of mathematic operations without some claimed practical application that are discussed accordance with the guidelines set forth in section 2106 of the MPEP.

***Allowable Subject Matter***

5. Claims 10-16 allowed.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2614

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
